

Lean Leadership – Using Lean-Six Sigma to Drive Teamwork

Practical Workplace Training Module

reduce waste ◆ increase throughput ◆ improve quality

A Lean Culture is Teamwork

Our lean leadership workshop is targeted at managers and workplace leaders at all levels, showing them how a lean culture that deploys process improvement tools & techniques acts powerfully and practically to improve teamwork, culture and morale, while achieving important performance growth.

Participants learn practical methods for generating improvement ideas, prioritising improvement projects, creating project plans and leading teams through change. Through this process they gain trust, respect and commitment from their teams, creating an environment where people are striving for unified goals and constantly pursuing excellence.

Lean Leadership is a practical workshop, where participants conduct exercises and challenges to develop skills using real situations from their workplace. Past participants have found the program inspiring and immediately useful in their organisations

There is a solution that pays for itself
